

Wellness International - a testimonial

I was one of the pioneers of bringing Wellness International into adidas in 1997. As THE “Performance Sports Brand” it made absolute sense to carry this through to the “performance” of our staff. Wellness International have been delivering that service to the adidas organisation here in the UK and I have been one who has experienced the first class service and knowledge of the staff. I am assessed annually and try to live by the advice I am given on my training and overall lifestyle.

Adidas, alongside Wellness International, has pioneered in the UK Wellness in the corporate setting for 13 years. Our staff are truly fortunate to have this world class facility free of charge and on their doorstep.
